Argenplás 2026: An event with strong international backing

An industry committed to the environment, the circular economy, and innovation

The upcoming edition of Argenplás 2026, which will be held from November 3 to 6, 2026, at the La Rural Trade Center in Buenos Aires, will once again feature the support of ABIMAQ (Brazil), a significant number of Italian companies, as well as a large attendance of companies representing China, among others.

The Argentine Plastics Industry will be presented this November with renewed energy and strength to execute joint projects between transformers and suppliers within the framework of the 20th International Plastics Exhibition. This dynamic industrial sector is present in every area of the economy and is the protagonist of this important event, serving as the growth engine for the Argentine industrial sector, which for years has been intrinsically linked to plastics due to its importance in supplying inputs to other industries.

The plastics processing sector in Argentina is currently one of the most important in the region, having reached a high degree of development in recent years through sustained investment, renewal of capital goods, technological updates, workforce training, and environmentally responsible industrialization.

Furthermore, there has been significant growth in production, exports, investments, and job creation, reaching interesting export destinations such as Brazil, Chile, Uruguay, the United States, and China, among others.

There are approximately 3,500 plastic manufacturing companies in Argentina, which directly employ 38,000 workers, with the largest presence in the Federal Capital, Greater Buenos Aires, and the provinces of Santa Fe, Córdoba, and San Luis.

Argenplás 2026 will be the setting for the prosperous Argentine Plastics Industry to generate business

Four days of exhibition, academic sessions, and workshops

Argenplás 2026 solidifies its position as an international business platform for both large companies and SMEs, where exhibitors and visitors will be able to learn about the next steps and challenges of the plastics industry from local and international market leaders and benchmarks over four days of exhibitions, academic sessions, and workshops.

Four days of business in an ideal setting to establish commercial ties and learn about the latest technological advancements in the national and international plastics industry, which will present a varied range of products, equipment, inputs, and services.
